

About this Portfolio

As a current senior at Baylor University, I am about to begin my journey of starting a professional career in the workplace setting. I really enjoy the music setting but I hope to learn more about the field of arts administration as I continue to grow both as a musician and as a young person starting out in a new career. This site was created as a way for me to share my professional experiences and interests with those in the professional workplace in the fields of music performance or arts administration. Overall, the purpose of this site is for me to be able to share some of my best work as a musician while also showcasing some samples of my professional writing I have done as a music student. Currently, this website is constantly being updated with new videos as have new performance opportunities and graduate school applications being due soon. This site has been structured in a way that everything is organized and easy to find on each specific page. Each page has a different element that could be used for audition or professional purposes.
